*The Business Research
Company*

forecasts the [web real-time communication market](#) is expected to grow from \$4.19 billion in 2021 to \$6.05 billion in 2022 at a compound annual growth rate (CAGR) of 44.37%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, effecting many markets across the globe. The web real-time communication market is expected to reach \$27.25 billion in 2026 at a compound annual growth rate (CAGR) of 45.66%.

The growing popularity of BYOD will propel the web real-

time communication market growth.

Web Real-Time Communication Market Trends

New product innovation is the key trend that is gaining popularity in the web real-time communication market. Major companies operating in the web real-time communication market are focused on research and development for product innovations that could give better solutions to customers and strengthen their position in the market.

[Web Real-Time Communication Market Overview](#)

The web real-time communication market consists of sales of web real-time communication by entities (organizations, sole traders, and partnerships) that are used for real-time data transfer for communications without the need for a custom interface, special software, and extra plugins for integration. Web Real-Time Communication (WebRTC) is an open-source project developed to embed real-time video, voice, conferencing, messaging, and other capabilities through JavaScript APIs within web browsers. It provides browser-to-browser communications without the need for additional plugins/utilities.
