forecasts the intravascular catheters market is expected to grow from \$5.29 billion in 2021 to \$5.87 billion in 2022 at a compound annual growth rate (CAGR) of 10.92%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, effecting many markets across the globe. The intravascular catheters market is expected to grow to \$9.15 billion in 2026 at a compound annual growth rate (CAGR) of 11.73%.

The rising hospitalization rate owing to the high prevalence of chronic diseases is driving the growth of the intravascular catheters market.

Intravascular Catheters Market Trends

The product innovations are a key trend gaining popularity in the intravascular catheters market. Major players in the intravascular catheters market are focusing on innovation of new products with advanced features to strengthen their position.

Intravascular Catheters Market Overview

The intravascular catheters market consists of sales of intravascular catheters by entities (organizations, sole traders, and partnerships) that are used for the administration of fluids, medication, blood products, and nutrition, which typically goes into a large vein in the arm or chest. The intravascular catheter is a device typically comprised of a hollow fibre through which blood flows and an immunoisolating membrane separates the transplanted cells from the blood.
