Market Analysis and Insights:

Internal organizational communication plays a crucial role in driving collaboration, productivity, and workforce engagement in an enterprise. In addition, the crucial need to maintain proper communication with deskless employees and growing share of remote workforce owing to ongoing COVID-19 pandemic are among the important factors boosting the adoption of employee communication software and services globally. Due to the pandemic, companies are shifting toward remote working culture owing to restrictions on on-premise business activities and movement restrictions implemented in various countries. The structure of today's enterprises is becoming more dynamic and complex, especially in industries such as retail and healthcare where a large section of workforce is deskless/mobile in nature. The COVID-19 outbreak is further driving the trend of remote working in industries such as BFSI,

manufacturing, and IT and telecom. Hence, due to increasing share of deskless workforce across industries, the demand for multi-platform communication tools (desktop, mobile, tablets etc.) is expected to rise at an impressive rate in the coming years.

The growth of the outlook of employee communication software market in all the major regions is likely to propel during the forecast period. The COVID-19 outbreak is expected to further drive the adoption of employee communication software among enterprises owing to mass lockdowns, travel bans, and business shutdowns across all countries. The companies have implemented work from home policies as a preventive measure to prevent the spread of COVID-19. Thus, there is a sudden increase in y-o-y growth of the employee communication software market in 2020and will continue during the forecast period.

A few companies operating in the employee communication software market are Beekeeper AG; Nudge Corporation; Poppulo (E-Search DAC); Simpplr Inc.; Smarp Oy; SnapComms; Sociabble, Inc.; Staffbase; theEMPLOYEEapp; and Workvivo Limited.

The employee communication software market is segmented into deployment type, enterprise size, industry, and geography. Based on deployment type, the employee communication software market is divided into cloud and on-premise. Cloud segment is projected to hold a larger share during the forecast period. On the basis of enterprise size, the market is segmented into SMEs and large enterprises. The large enterprises segment held a larger revenue share in 2019, whereas SMEs segment is projected to be a faster growing sector in terms of growth rate. On basis of industry, the market is segmented into BFSI, manufacturing, retail, healthcare, IT & telecom, and others. In 2019, IT and telecom industry led the employee communication software market globally.

Geographically, the market is segmented into five major regions, namely North America, Europe, APAC, MEA, and SAM. In 2019, North America held the largest share followed by Europe and APAC. APAC is projected to be the fastest-growing region from 2020 to 2027.

Highlighted Key Points Covered in this Updated Research Reports Include:

Research reports involve the overall industry status worldwide.
Impact of Covid-19 on market growth, size, share & sales.
Comprehensive analysis market drives & manufacturers with the latest innovation.
Report provides country-wise economic business status and opportunities.

It is also providing an in-depth analysis of company profiles, production, value, price, and supply chain.
Major changes were seen in the competitive landscape.
Segmentation on the basis of types, Applications & regions.
New business development analysis & industry challenges.

Geographically, this research report is segmented into the following key regions with size, sales, share, revenue & industry growth rate forecast analysis by 2020 -2027.

North America
Europe
Asia-Pacific
Middle East and Africa
South America
