The Business Research Company

forecasts the patient registry software market is expected to grow from \$1.56 billion in 2021 to \$1.80 billion in 2022 at a compound annual growth rate (CAGR) of 15.6%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, effecting many markets across the globe. The [patient registry software market size](#) is expected to grow to \$2.96 billion in 2026 at a CAGR of 13.2%.

The rising adoption of electronic medical records (EMRs) is contributing to the growth of the patient registry software market going forward.

Patient Registry Software Market Trends

Product innovations are the key trends gaining popularity in the patient registry software market. Major companies operating in the patient registry software sector are focused on developing new product innovations to strengthen their position in the market.

[Patient Registry Software Market Overview](#)

The patient registry software market consists of sales of patient registry software by entities (organizations, sole traders, and partnerships) that are used to collect information about a patient's diagnosis or condition, as well as the number of new medical equipment that is being used or going through a new process. Patient registry software refers to a structured system for gathering non-clinical or clinical patient data to evaluate certain outcomes using observational study methodologies. They also comprise personal, medical, social, and financial information provided by healthcare providers or patients.
