

Green Lite Line LLC Launches Game-Changing Ultrasonic Training Device for Dogs

The device provides a safe and effective solution for dog training and bark control.

SHERIDAN, WYOMING, UNITED STATES, November 28, 2022 /EINPresswire.com/ -- Green Lite Line LLC is pleased to announce the release of its revolutionary [Ultrasonic Anti-Barking Control Device](#) on Amazon.

Green Lite Line LLC is a pet product development and distribution company that offers premium quality products and superior 24/7 customer service. The company focuses primarily on products for pets and their owners and is a reputable seller on the Amazon marketplace platform, boasting a perfect score of 5/5 stars.

In the company's most recent news, Green Lite Line has launched its most exciting product to date, the Ultrasonic Anti-Barking Control Device. The [rechargeable dog silencer](#) is the ultimate solution for deterring barking, enhancing behavior training, and acts as a useful alternative to bark collars or whistles. In fact, according to the company, the device is 2.7 times faster when addressing behavior modification and can be used to stop unwanted chewing, digging, biting, chasing, and of course, barking.

"Our Ultrasonic Anti-Barking Control Device is 3.3 times more effective than an anti-bark collar, which subjects your beloved pet to a painful sting," says developer of the device, Michael Rollins. "Instead, we have leveraged the latest patented NPS technology to grab your pet's attention, or that of irritating neighborhood dogs, and stop them immediately in their tracks. Users can choose from a variety of settings, such as whistle mode, strobe mode, flashlight mode, and 25hz ultrasonic training mode to modify behaviour instantly."

Additionally, the anti-barking control device boasts several additional features and benefits, including:

- Adjustable, anti-static wrist strap
- Lightweight, ergonomic, and pocket-sized design
- Easy-to-use, one button design that can be used by children and the elderly
- Completely safe for dogs, without inflicting ear-splitting damage
- Three ultrasonic sound frequencies, including low, medium, and strong
- LED indicator light to show working status and battery status

- Auto shut-off
- Rapid 1-hour charge with long-lasting 32-hour battery
- And so much more!

What truly sets Green Lite Line apart from the competition, however, is its 100%, no questions asked, money-back guarantee. If, for any reason, a consumer is not satisfied with their product, an immediate refund will be issued.

For more information about the Ultrasonic Anti-Barking Control Device, or to order, please [click here](#).
