Looking forward, IMARC Group expects the market to reach US\$ 2.62 Billion by 2027, exhibiting at a CAGR of 2.6% during 2022-2027.

Vinegar is a sour-tasting aqueous liquid that is prepared two-step fermentation process, wherein various distilled alcoholic beverages, such as beer, cider, and wine, are exposed to acetic acid for product formation. It includes fruit, palm, white, rice, red, balsamic, and cane grains as standard product variants that are available in fig, lemon, herbs, and raspberry scents or flavors. Vinegar protects cells from oxidative stress and promotes fat burning for weight loss; thus, it is used as an acidic ingredient in ketchup, sauce, mayonnaise, dressings, and mustard and for pickling vegetables.

The significant expansion in the food and beverage (F&B) industry and the escalating demand for processed meals due to hectic schedules, has intensified vinegar usage as a preservative and flavoring agent in dressings and dishes, which is primarily driving the market growth. Moreover, the growing consumer awareness regarding the anti-microbial and anti-diabetic properties of vinegar has prompted users to consume it as a health drink to lower cholesterol and maintain

blood sugar levels. Additionally, the extensive utilization of vinegar in medicinal disinfectants, antiperspirants, stain removers, dyes, and hair conditioners are propelling the market growth. Besides this, the increasing need for effective herbicides has facilitated the incorporation of wood vinegar in diverse natural agricultural products to improve soil enrichment, promote crop growth, ensure seed germination and enhance fruit quality, this in turn, is supporting the market growth.
