the [e-commerce logistics market](#) is predicted to reach a value of \$568.85 billion in 2022 at a compound annual growth rate (CAGR) of 19.4%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, effecting many markets across the globe. The e-commerce logistics market is expected to grow to \$1163.56 billion in 2026 at a CAGR of 19.6%. The growth of digital technology is expected to propel the growth of the e-commerce logistics market going forward.

[E-Commerce Logistics Market Trends](#)

Technological advancement is a key trend gaining popularity in the E-commerce logistics market. Major companies are integrating novel technologies such as Blockchain, automation, and

patented technologies to provide insights, increase consumer experience, and secure operations. Blockchain and automation technologies decrease the cost and time for delivery. For instance, in June 2021, Whitebox, a US-based brand-focused e-commerce management platform, launched Omnifi, a business intelligence technology. The patented solution addresses the issue of fragmented data across sales channels by bringing together marketing, sales, and logistics. Omnifi is the first solution of its type to provide brands and retailers with a unified view of their customers across digital channels, resulting in a single source for all of their e-commerce demands.

Overview Of The E-Commerce Logistics Market

The e-commerce logistics market consists of sales of e-commerce logistics services by entities (organizations, sole traders, and partnerships) that are used to deliver products to online businesses or customers. E-commerce logistics refers to the process of providing shipping services to online businesses, and it involves inventory management, warehousing, packaging, labeling, billing, shipping, payment collection, return, and exchange of delivered products.
