

Eclipses MTE Technology® Achieves ThingWorx Ready Status

PTC Partner Eclipses, Inc. Offers New PTC Marketplace Solution, MTE Technology Enabling ThingWorx Users to Provide Security to Data-in-Transit

BOSTON, MA, USA, November 29, 2022 /EINPresswire.com/ -- Eclipses, Inc. announces it has joined the [PTC Partner Network](#) and their integration [Eclipses MTE Extension](#) has achieved ThingWorx Ready™ status. The PTC ThingWorx Ready program enables technology companies to validate their products' interoperability with PTC's ThingWorx® Industrial Internet of Things (IIoT) platform.

Eclipses MTE Extension has achieved ThingWorx Ready™ status.

Following a product's ThingWorx Ready designation, that product becomes visible on the [PTC Marketplace](#), a digital space where PTC partners and customers can promote IIoT tools, market-ready solutions, and innovative technologies designed to aid solution deployments.

Our network of technology partners allows us to offer our joint customers innovative IIoT solutions that enable them to accelerate time to business value."

*Peter LeBlanc, Senior Director,
Strategic Alliances at PTC*

The Eclipses MTE Extension allows PTC device partners to add an additional layer of security that protects data communicated between an edge device (also known as a "Thing") and the ThingWorx platform.

With this integration, companies can ensure bad actors cannot access valuable information at any point during the data transmission process through the use of endpoint verification and zero trust with full knowledge. The award

winning MTE technology received the FIPS 140-3 validation. Seen as the gold standard in data security, this validation proves that Eclipses' MTE data protection technology effectively and consistently safeguards user data.

The Eclipses MTE Extension for ThingWorx provides users with a seamless way for adding a higher level of security to any data moving to and from the ThingWorx platform. This extension utilizes the Eclipses MTE Library, which must be obtained from Eclipses and added to the Extension and edge SDK.

“Protecting the most vulnerable data from cyberattacks has always been our top priority at Eclipses. Our MTE technology is uniquely positioned to create an advanced security strategy that enhances any existing security measures in place across any IoT network,” said David Gomes, COO of Eclipses. “We are very excited to be a part of the ThingWorx Ready Program and look forward to working with PTC and the PTC partner ecosystem to provide customers with a higher level of security for the ever-growing number of cyber threats.”

“We’re pleased to welcome Eclipses to the ThingWorx Ready Program,” said Peter LeBlanc, Senior Director, Strategic Alliances at PTC. “Our network of technology partners allows us to offer our joint customers innovative IIoT solutions that enable them to accelerate time to business value.”

About Eclipses

Eclipses sets the new standard for protecting your most sensitive data while in transit. Their disruptive technology, MicroToken Exchange® (MTE®), offers a transformative cyber security solution to replace actual data with instantly obsolete, meaningless random streams of values. Eclipses developed the MTE technology to be the most innovative and disruptive security solution for protecting data communication for web and mobile applications, and IoT devices. Eclipses has received the Federal Information Processing Standard 140-3 (FIPS 140-3) validation after an independent, NIST accredited laboratory put the Eclipses encryption modules through a series of tests for its MTE technology. In 2022, Eclipses won Best Cybersecurity Solution in the FTF News Technology Innovations Awards. For more information, please visit www.eclipses.com.

ThingWorx, ThingWorx Ready and PTC are trademarks or registered trademarks of PTC Inc. and/or its subsidiaries in the United States and other countries.
