*The broadening trend of RTE food and rapid urbanization is Anticipated to Boost Product Demand.*

HYDERABAD, TELANAGANA, INDIA,  
November 30, 2022 /

EINPresswire.com/ -- IndustryARC, in its latest report, predicts that the [Air Dried Vegetables Market](#) size is estimated to reach \$17.5 billion by 2027, growing at a CAGR of 8.1% during the forecast period 2022-2027. Air Dried vegetables are generally delineated as vegetables that are appropriately processed in

order to confiscate the presence of moisture and water content so that their overall shelf life can be elongated. Drying averts spoilage preserves food by eliminating the presence of bacteria and yeast. Several vegetables such as peas, tomatoes, cabbages, carrots, shiitakes, and others are frequently dehydrated using technologies like vacuum drying, air drying, and freeze-drying. Besides dehydration, many countries practice food processing techniques like food irradiation according to their own standards to lengthen the product's shelf life by delaying the ripening process. For instance, many European nations allow irradiation of only specific herbs and seasonings that too at specific doses, whereas, countries like Brazil allow irradiation of all foods.
