DOUGLAS, ISLE OF MAN, November 30, 2022 /EINPresswire.com/ -- [Continuous Positive Airway Pressure Mask Market Size Analysis:](#)

Continuous Positive Airway Pressure (CPAP) therapy is a clinical treatment for moderate to severe obstructive sleep apnea. Continuous Positive Airway Pressure (CPAP) devices prevent episodes of airway collapse that obstruct breathing in patients with obstructive sleep apnea and other associated conditions. One of the most common ways to treat sleep apnea is with Continuous Positive Airway Pressure (CPAP) therapy.

The therapy of continuous positive airway pressure (CPAP) is also administered to infants and children with breathing disorders. CPAP (Continuous Positive Airway Pressure) systems consist of a machine, a flexible tube, and a mask. The tube links the mask to the machine. Continuous Positive Airway Pressure (CPAP) masks are designed to cover either the nose or the mouth. There are various types of masks available on the market, such as nasal masks, full-face masks, paediatric masks, and nasal pillow masks.

The expanding elderly population exacerbates the alarming increase in chronic obstructive pulmonary disease (COPD) and sleep apnea/hypopnea syndrome (SAHS) diagnoses. The demand for treatment of lung and pulmonary airway diseases is also increasing.

Even though all of these things increase the need for respiratory therapy and devices, especially continuous positive airway pressure (CPAP), the recent announcement of a global COVID-19 pandemic is seen as a major market driver for CPAP.

In addition, technological advancements such as improved mask designs continue to drive the rising demand for CPAP devices. Patients have said over the years that they don't feel completely comfortable while wearing these masks. This is what drives most design changes.

Key Players: Philips, ResMed, Fisher & Paykel, Air Liquide Medical Systems, Dräger, Vyaire Medical, Apex Medical, Intersurgical, DeVilbiss Healthcare, BMC Medical, Hamilton Medical, Sleepnet, and Hans Rudolph, Inc.
