The global [pet diabetes care market size](#) reached US\$ 1.71 Billion in 2021. Looking forward, IMARC Group expects the market to reach a value of US\$ 2.76 Billion on by 2027, exhibiting a growth rate (CAGR) of 8.10% during 2022-2027.

〇〇〇〇〇-〇〇 〇〇〇〇〇〇:

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

〇〇〇〇 〇〇 〇 〇〇〇 〇〇〇〇〇〇〇〇〇 〇〇〇〇 〇〇〇〇〇〇〇?

Pet diabetes care represents continuous monitoring and treatment of blood sugar levels in animals. They include insulin therapy and oral medications. These pet diabetes care solutions stabilize blood sugar levels, aid in regulating the level of glucose in the bloodstream, and control the delivery of glucose to the body tissue of the animals.

They prove highly effective in reducing unpleasant symptoms of low and high blood sugar and decreasing the risks of severe complications, such as dementia, urinary tract infections (UTI), kidney issues, skin allergy, vision loss, etc. As a result, pet diabetes care medicines and therapies are extensively utilized in veterinary hospitals and clinics across countries.

What are the major market drivers in the Pet diabetes care market ?

The emerging trend of pet humanization and the growing awareness among pet parents about the overall health and well-being of pets are primarily driving the pet diabetes care market.

In addition to this, the escalating usage of insulin treatment for diabetic cats and dogs that reduce blood glucose levels by improving peripheral consumption of glucose and lowering the production of hepatic glucose is further stimulating the market growth.

Apart from this, the development of smart wearable devices equipped with machine learning (ML), artificial intelligence (AI), and the internet of things (IoT) to facilitate remote tracking of pet health is also positively influencing the global market. In line with this, the introduction of specific and highly targeted drugs for diabetes in pets that have minimal side effects is acting as another significant growth-inducing factor.

Moreover, the expanding veterinary clinics and hospitals across the globe and the launch of several animal health awareness programs by government bodies are anticipated to propel the pet diabetes care market in the coming years.

Key market drivers:

- Treatment
- Glucose Monitoring Devices

Key market segments:

- Dogs
- Cats

Regional market analysis:

- Veterinary Hospitals and Clinics
- Retail Pharmacies
- Online Stores

Geographical Segmentation:

- Asia Pacific
- North America
- Europe
- Middle East and Africa
- Latin America

On the geographical front, Asia Pacific enjoys the leading position in the market. This can be attributed to the rising establishment of international companies in the region, on account of low manufacturing costs and cheap labor.

Major Players in the Market:

The major players in the market are  
 ACON Laboratories Inc.  
 Allison Medical Inc.  
 Becton Dickinson and Company  
 Boehringer Ingelheim International GmbH  
 i-SENS Inc.  
 Merck & Co. Inc.  
 Trividia Health Inc. (Sinocare)  
 UltiMed Inc.  
 and Zoetis Inc.
