Key Takeaways:

This IndustryARC report on the White Box Server Market highlights the following areas –

- Rackmount segment in the White Box Server market is analyzed to grow at the fastest rate of 16.8% CAGR in the global White Box Server market during the forecast period 2022-2027. It is due to the rising deployment of data centers in the business & industrial sectors, increasing demand for high-performance computing servers and other major factors.
- Based on application White Box Server market for data centers is analyzed to grow with the highest CAGR during 2022-2027, attributed to the increasing adoption of low-cost storage

facilities, rising technological knowledge among medium-sized data centers and so on.

- North America dominated the global White Box Server market with a share of 38% in 2021, attributed to the presence of a large number of data centers, increasing adoption of White Box Servers in data centers & enterprise solutions and so on.

Segmental Analysis:

- By Type - The rackmount segment in the White Box Server market is analyzed to grow at the fastest rate of 16.8% CAGR in the global White Box Server market during the forecast period 2022-2027. Factors attributing to this market growth include the rising deployment of data centers in the business & industrial sectors, increasing demand for high-performance computing servers to deliver optimal results with faster networking and others.
- By Application - White Box Server market for data centers is analyzed to grow with the highest CAGR 2022-2027, attributed to the increasing adoption of low-cost storage facilities, rising technological knowledge & experience among small & medium-sized data centers and other major factors.
- By Geography - North America dominated the global White Box Server market with a share of 38% in 2021, attributed to the presence of a large number of data centers, increasing adoption of white box servers in data centers and enterprise solutions run by large internet companies such as Facebook, Google and so on.
