According to 'B2B Telecommunication Global Market Report 2022 – Market Size, Trends, And Global Forecast 2022-2026' published by The Business Research Company, the [B2B telecommunication market](#) size is expected to reach a value of nearly \$65.44 billion in 2022 at a compound annual growth rate (CAGR) of 16.2%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, effecting many markets across the globe. The B2B telecommunications market is expected to reach \$117.01 billion in 2026 at a compound annual growth rate (CAGR) of 15.6%. The increase in industrialization and

The B2B telecommunication market consists of sales of B2B telecommunication services by entities (organizations, sole traders, and partnerships) that are used for direct communications between businesses to transmit data, text, sound, voice, and video. B2B telecommunication refers to electronic commerce, which is used while the exchange of products, services, and information between businesses, rather than between businesses and consumers (B2C). A B2B transaction is conducted between two companies, between wholesalers and online retailers.

Technological innovations are the key trends gaining popularity in the B2B telecommunication market. Major companies operating in the market are introducing new technologies such as SD-WAN an advanced technology to sustain their position in the market. For instance, in July 2021, Airtel India, an Indian-based company operating in telecommunication, and Cisco System Inc., a US-based multinational company operating in telecommunication and IT solutions, combined developed and launched their next-gen connectivity technology Cisco SD-WAN Connect. Cisco SD-WAN Connect provides unique integrated capabilities for multi-cloud, security, unified communications, and other features in a SASE (Secure Access Service Edge) enabled architecture in telecommunication.
