expected to grow from \$4.10 billion in 2021 to \$4.26 billion in 2022 at a compound annual growth rate (CAGR) of 3.93%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, effecting many markets across the globe. The steel roofing market is expected to grow to \$4.93 billion in 2026 at a compound annual growth rate (CAGR) of 3.73%. An increase in investments in the construction of residential buildings is expected to propel the growth of the steel roofing market going forward.

The steel roofing market consists of sales of steel roofing products by entities (organizations, sole traders, and partnerships) that are used to manufacture steel (metal) roofing systems to enhance their functionality. A steel roof refers to a type of roofing system that is made up of

steel pieces or tiles. Steel roofing is particularly engineered to last longer than any other roofing material. The installation of the steel roofs offers aesthetics, energy efficiency, and durability, and prevents leaks. The steel roofs can be recycled.

Global [Steel Roofing Market Trends](#)

Product innovations are the key trend gaining popularity in the steel roofing market. Major companies operating in the market are introducing new product innovations such as Boral Steel™ and Boral Roofing, which are manufactured by using stone-coated steel roofing systems to sustain their position in the market.
