Multi-Vendor Support Services Global Market Report
2022: Market Size, Trends, And Forecast To 2026

According to 'Multi-Vendor Support Services Global Market Report 2022 – Market Size, Trends, And Global Forecast 2022-2026' published by The Business Research Company, the multi-vendor support services market size is expected to reach a value of nearly \$59.53 billion in 2022 at a compound annual growth rate (CAGR) of 4.08%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, effecting many markets across the globe. The multi-vendor support services market is expected to reach \$67.58 billion in 2026 at a compound annual growth rate (CAGR) of 3.22%. A significant increase and presence of

The multi-vendor support services market consists of sales of multi-vendor support services by entities (organizations, sole traders, and partnerships) that are used by businesses to support both their products and multiple products from other manufacturers. Multivendor Support reduces downtime by streamlining problem identification and resolution across the business environment. Multi-vender support service means services provided by multiple vendors for items such as consulting, education, management of the information systems, systems planning, development, integration and maintenance, and training in the organization.

[Global Multi-Vendor Support Services Market Trends](#)

Demand for multi-vendor support services by telecom operators is a new trend gaining popularity in the multi-vendor support services market. To offer services suitable for 2G/3G/4G, future 5G mobile, data, TV, fixed line, and unified communications, communication service providers (CSPs) are developing complicated multi-vendor networks (UC). For instance, in September 2021, Vodafone successfully tested a system with the help of Benu Networks, Casa Systems, Cisco, and Nokia that would make it quicker and simpler to deploy faster-fixed broadband services to both new and current customers throughout Europe. This is a step in enabling the present monolithic, single-supplier broadband gateways to benefit from increased technical innovation from a more varied supply chain that is called Disaggregated BNG technology will alter the way the broadband networks are created.
