

New CEDIA Focused Sound Bar Shelves Debut at CES 2023

Hangman Products will launch two specialized sound bar shelves at CES 2023 to fit the best-selling sound bar brands for installers in CEDIA and beyond.

LAS VEGAS, NV, USA, January 4, 2023 /EINPresswire.com/ -- Hangman Products will launch two [Professional Sound Bar Shelves](#) at CES 2023 designed for the professional installer. Based on interviews with nearly 200 CEDIA (Custom Electronic Design & Installation Association) professionals, Hangman re-envisioned the mounting system on their [No Stud Sound Bar Shelves](#), designed for DIYers, to serve the professional, as well as zeroing in on the shapes and sizes of the hottest sound bars.

Constructed of lightweight aircraft-grade aluminum with powder-coated finishes in black or white, these sleek shelves install quickly and securely, avoiding cumbersome attachment mechanisms. Using Hangman's signature French cleat system with a bubble level in its extruded track, along with professional hardware, shelves hold over 50 pounds and install flush and tight to the wall in minutes. Depending on the shape of the sound bar, edges are either rounded or squared.

Models SBS-25.6K-PROSB, SBS-25.6W-PROSB fit Sonos® Beam, BOSS Audio Systems® BRT26A, Harman Kardon® SB26 and more.
