

Fruit Fiber Market worth \$356.7 million by 2027 at a growth rate of 4.2% - IndustryARC

Jaw-dropping expansion in inflation rates, plummeting yield of fruit because of environmental calamities, and unemployment are said to reduce the market growth.

HYDERABAD, TELANGANA, INDIA, December 2, 2022 /EINPresswire.com/ -- IndustryARC, in its latest report, predicts that [Fruit Fiber Market](#) size is estimated to reach \$356.7 million by 2027, growing at a CAGR of 4.2% during the forecast period 2022-2027. Fruit

fiber is a mixture of fibers (soluble or insoluble) derived specifically from fruit such as apple, passion fruit, banana, orange, grapefruit, and many more. Fibers extracted from fruit like bananas, sugarcane, coconut, and pineapple are widely used in textile fabrics. Besides, Guar gum is a renowned vegetable fiber resulting from guar beans. It plays a significant role as a stabilizer and thickener in food applications. Also, microcrystalline cellulose extracted from wood pulp is used in pharmaceuticals as an excipient. Fiber-rich fruit helps in the absorption of water from digestive juices in the gut and reduces food intake over time; therefore, they are quite significant when it comes to weight management. Owing to the presence of lactic acid, fruit fibers also depress the risk of gastrointestinal infections, ease defecation, promote the health of the heart and digestive system, and reduce bad cholesterol levels. Furthermore, increasing disposable incomes, broadening health attentiveness among consumers, and swelling prevalence of chronic diseases are factors set to drive the growth of the Fruit Fiber Global Market for the period 2022-2027.
