## Portable Media Player Market Trends

Technological advancements are the key trend gaining popularity in the portable media player market. Major companies operating in the market are developing new technologically advanced products such as the M17 portable desktop class music player that uses dual audio channels for an improved experience. For instance, in January 2022, FiiO, a China-based electronics company introduced the FiiO M17 portable desktop class music player. The device's unique features are left and right audio channels each containing a desktop-class, 8-channel ES9038PRO flagship digital audio signal (DAC) thereby providing clear audio and improved experience to its users and extremely pure audio reproduction. The device's output power is increased by 225% up to 3000mW per channel with a lower output impedance.

## Portable Media Player Market Overview

The portable media player market consists of sales of portable media player products by entities (organizations, sole traders, and partnerships) that are used for playing music as audio files, such as MP3. A portable media player refers to a type of portable electronic device that is designed for handling digital media. The kinds of media files that can be played depending on the device's capabilities.
