Nutritionally enhanced food is known as therapeutic food (RTUF) and is used to treat childhood malnutrition. This cuisine provides a good source of protein, energy, and vital vitamins and minerals. The popularity of home-based

therapy has recently increased due to the accessibility of novel food, a spreadable type of therapeutic food (RUTF). The market for ready-to-use therapeutic food is projected to grow as government and non-governmental efforts to treat malnutrition increase. Additionally, a rise in calamities and disasters, as well as increased knowledge of a healthy child's diet and

supplements among government organizations, individuals, and NGOs, boosts market growth. However, the cost of the ready-to-use therapeutic food product is higher due to the use of ingredients, which makes it more difficult for governmental and non-governmental organizations to invest more money in ready-to-use therapeutic foods. Rising public awareness of the need to battle malnutrition and resounding backing from governmental and non-

governmental organizations worldwide will likely have the most influential effects on how successfully ready-to-use therapeutic food items function globally soon. To earn money for buying and distributing RUTF goods in undeveloped Asian and African countries, some organizations are increasingly working with various government-funded programs. However, the high cost of RUTF products may continue to put a financial strain on people, governments, and non-governmental organizations in developing economies.

Major Players in the Ready To Use Therapeutic Food Market:

GC Rieber Compact AS

Diva Nutritional Products

Edesia USA

Hilina

InnoFaso, Insta Products

Mana Nutritive Aid Products

Nutriset SAS

NutriVita Foods

Power Foods Tanzania

Tabatchnik Fine Foods

Market Dynamics:

Drivers-

The market for ready-to-use therapeutic food is anticipated to grow as government and non-governmental efforts to combat malnutrition progress. The delivery of ready-to-use therapeutic foods to these malnourished children in African and Asian nations is being funded by governments and non-governmental organizations, furthering the science of ready-to-use therapeutic foods. Additionally, a rise in tragedies and disasters, as well as a rise in the public's awareness of healthy child nutrition and supplements among the general public, governments, and NGOs, drive market expansion.

Challenges:

The government's projected preference for domestic components will impede the market expansion of ready-to-use therapeutic food (RUTF). Ingredients of UNICEF's Standard RUTF formula include milk powder, peanuts, oils, vitamins, and minerals; however, milk powder and peanuts are not always economically viable. As a result, regional producers and authorities favour using less expensive substitutes for peanuts and milk powder when creating RUTF products. This factor is likely to restrict the growth of the ready-to-use therapeutic food market.

Regional Trends:

Europe is predicted to dominate the markets for ready-to-use therapeutic food (RUTF) due to the substantial manufacturing of reputable manufacturers who serve the Middle East and Africa with E products. The administration has introduced fresh initiatives to help malnourished kids, and most ready-to-use medical meals are made in Europe.

Additionally, Asia will likely experience more remarkable growth in the global market for therapeutic ready-to-eat foods. To earn money for purchasing and distributing RUTF goods in undeveloped Asian countries, some organizations are increasingly partnering with various government-funded programs.

Recent Developments:

- In February 2020- The RUTF factory owned by Ariel Foods FZE in Lagos was officially opened. In order to address severe acute malnutrition, therapeutic food will be produced in the ATLC facility. This product is recommended by the UN. Th
- In May 2020, T-he CMAM Association was established in India to fight chronic childhood malnutrition. This will be done by selling ready-to-use therapeutic foods across the community (RUTF).

Segmentation of Ready To Use Therapeutic Food Market-

By Product Type:

- Solid
 - o Powder/Blends
 - o Biscuits/Bar
- Semi-solid Paste
- Drinkable Therapeutic Food

By Region-

North America-

- The US
- Canada
- Mexico

Europe-

- Germany
- The UK

- France
- Italy
- Spain
- Rest of Europe

Asia-Pacific-

- China
- Japan
- India
- South Korea
- South East Asia
- Rest of Asia Pacific

Latin America-

- Brazil
- Argentina
- Rest of Latin America

Middle East & Africa-

- GCC Countries
- South Africa
- Rest of Middle East and Africa
