A suction catheter is a medical tool to remove biological fluids from the upper airway, such as mucus or saliva. A suction device or collection canister is connected to a suction catheter. The market for suction catheters is expanding due to the rising prevalence of chronic diseases that are increasing hospitalization rates. Suction catheter

demand is fueled by increased financing from government agencies for R&D initiatives. Additionally, the market is expanding because of the rising demand for less invasive procedures brought on by technological improvements. It is projected that the prevalence of respiratory illnesses will rise due to the increasing prevalence of indoor and outdoor air pollution, allergens,

hazardous particles, and tobacco smoking. Suction catheter demand is driven by the rising financial burden of medical expenses associated with respiratory illnesses. In addition, there was a shortage of latex from Vietnamese plantations for catheters because much of the latex and rubber was used to make car tires. The demand for suction catheters is driven by the rise in chronic respiratory diseases like asthma and C.O.P.D., as well as the rise in player initiatives for R&D.

#### Major Players in the Suction Catheters Market:

Medline Industries L.P

B Braun SE

BD

Aminso International Inc.

Cardinal Health

Dynarex Corporation

PFM Medical AG

Ivor Shaw T/A Pennine Healthcare

Smiths Group Plc

#### Market Dynamics:

##### Drivers-

One of the main drivers of expanding the global market is the rise in chronic respiratory disorders such as lung cancer, chronic obstructive pulmonary disease (C.O.P.D.), acute lower respiratory tract infections, and asthma. Suction catheters are becoming more and more necessary due to the development of chronic respiratory conditions like asthma and C.O.P.D., as well as player R&D activity. Additionally, the growth of the market is influenced by minimally invasive surgery. Medical suction equipment is essential in many medical operations, such as using a vacuum to remove saliva, mucus, and other fluids from the respiratory tract. Therefore, the rise in respiratory disease prevalence is projected to drive demand for these devices over the coming several years.

##### Challenges:

The reimbursement options offered for the use of suction devices have emerged as a significant barrier to expanding the market for suction catheters. In addition, the regulatory standards applied to local players are stringent, restraining the market's expansion.

## Regional Trends:

The North American suction catheter market is expected to register a significant market share in the revenue. Suction catheter sales in the region are being driven by a rise in player initiatives and consumer awareness, as well as an increase in market participants' business expansion. Due to the growing healthcare infrastructure, increasing government support, and an increasing number of startups in this area, Besides, Asia Pacific had a significant share in the suction catheters market. The local governments' activities, such as healthcare awareness programs and partnerships with N.G.O.s to increase healthcare awareness, are contributing to the change in demand patterns, which are driving the suction catheters market in Asian nations with increasing economic growth and urbanization.

## Recent Developments:

- In August 2022, Japan authorized the LC16 KMB monkeypox vaccine from K.M.K.M. Biologics.
- In July 2022, Bavarian Nordic announced an agreement with the United States Department of Health and Human Services (H.H.S.) for the 2.5 million Jynneos vaccines to be made available in the United States as soon as possible.

## Segmentation of Suction Catheters Market-

### By Type

- Closed Suction Catheters
- Yankauer Suction Catheters

### By Material

- Latex
- Latex Free

### By End-use

- Hospitals
- Ambulatory Care Centers
- Others

### By Region-

#### North America-

- The US
- Canada
- Mexico

#### Europe-

- Germany
- The UK
- France
- Italy
- Spain
- Rest of Europe

#### Asia-Pacific-

- China
- Japan
- India
- South Korea
- South East Asia
- Rest of Asia Pacific

Latin America-

- Brazil
- Argentina
- Rest of Latin America

Middle East & Africa-

- GCC Countries
- South Africa
- Rest of Middle East and Africa
