Binary Torrent LLC, a US-based network marketing

company, has a marketing agreement with [Lapland Minerals Inc](#) to offer global attention and create usability for its token LMGT made on Binance Smart Chain earlier this year. Lapland Minerals Inc plans to introduce its LMGT to the public at the end of 2023 and has based the value of the token of underlying assets on collateral agreements with regulated mining operators. One public LMGT equals the value in weight of 0.1 grams of gold, following the gold price index. In addition, it creates a more stable and secure way to store value than today's uncertain fiat currency volatility and the effect of government-infused inflation.

Bo continues, "Our marketing approach is unique and makes the usability of the token a worldwide phenomenon while simultaneously creating a haven for holders of LMGT. Today we

have an internal token without financial value outside the community. Still, when the listing of the public LMGT happens, all our members can swap their internal token to the external, public token." The swap process will exchange the internal token for the external public LMGT upon listing.

Binary Torrent LLC operates in Delaware, US, with sales organizations in over 50 countries in less than six months. To learn more about the company and its services, visit our website:
