market to reach a value of \$30.08 billion in 2022 at a compound annual growth rate (CAGR) of 11.0%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, effecting many markets across the globe. The ent devices market is expected to grow to \$41.04 billion in 2026 at a CAGR of 8.1%.

Many governments across the world have introduced new healthcare acts and continuously increased healthcare

spending.

[ENT Devices Market Trends](#)

ENT device manufacturers are investing in technologies to develop user-friendly and non-

invasive equipment. They are continuously investing funds and resources into R&D to increase the scope of their devices. For instance, Intersect ENT developed Propel Mometasone Furoate Implant (PMFI) to treat chronic sinusitis. It is a bio-absorbable steroid that is placed directly into the sinus mucosa. It controls the release of drugs and dissolves over time. In another breakthrough in sinusitis treatment, SinuSys Corporation received FDA approval for its Vent-Os Sinus Dilation device. It is a small, low-pressure insert that is designed to gently open the sinus ostia and use the body's natural mucosal fluids to expand the device.

### [ENT Devices Market Overview](#)

The ENT devices market consists of sales of ENT devices and related services by entities (organizations, sole traders, and partnerships) that produce ENT devices used in the diagnosis and treatment of ear, nose, and throat diseases.
