market share to reach a value of \$1.08 billion in 2022 at a
compound annual growth rate (CAGR) of 9.0%. The Russia-
Ukraine war disrupted the chances of global economic
recovery from the COVID-19 pandemic, at least in the short
term. The war between these two countries has led to
economic sanctions on multiple countries, surge in
commodity prices, and supply chain disruptions, effecting
many markets across the globe. The nebulizers market is
expected to grow to \$1.46 billion in 2026 at a CAGR of
7.9%.

The current Covid-19 pandemic has resulted in a surge in
demand for nebulizers.

[Nebulizers Market Trends](#)

The technologically advanced nebulizers including breath-enhanced, breath-actuated, and vibrating mesh nebulizers decrease the amount of drug lost during exhalation while increasing

the efficiency of drug delivery and shaping the nebulizer devices market. For example, in June 2020, Respira Technologies, a health technology platform development company, revealed the introduction of a pharmaceutical-focused commercial development program for its RespiRx drug delivery system. RespiRx is a compact, hand-holding vibrating mesh nebulizer built for local and systemic treatment and can work in any position placed by the patient. The latest and advanced nebulizers increase the output rate which in turn will decrease the administration time.

Nebulizers Market Overview

The nebulizer devices market consists of sales of nebulizers used in respiratory care for patients with respiratory diseases including asthma, cystic fibrosis, and COPD.
