Global Market Report 2022”, the masks (N95 respirators and other surgical masks) market grew from \$12.37 billion in 2021 to \$13.46 billion in 2022 at a compound annual growth rate (CAGR) of 8.8%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, effecting many markets across the globe. The [masks \(N95 respirators and other surgical masks\) market size](#) is expected to grow to \$18.1 billion in 2026 at a CAGR of 7.7%. The masks market is experiencing exponential growth due to the COVID-19

pandemic.

Key Trends In The Masks (N95 Respirators and Other Surgical Masks) Market

The shift towards disposable devices in developed countries is one of the major trends in the market. Disposable masks eliminate the need for product sterilization and reduce cross-contamination with other reusable products. They are also cost-effective, prevent contamination, and reduce hospital stay, whereas reusable non-woven, masks need to be decontaminated, washed, sterilized for every reuse. Although, reusable surgical face masks can be sterilized and laundered for reuse but are less protective and more time-consuming for production as well as washing and sterilization for reuse.

Overview Of The Masks (N95 Respirators and Other Surgical Masks) Market

The market for N95 respirators and other surgical masks (face masks) consists of sales of N95 respirators and other surgical face masks that are used as personal protective equipment to protect the wearer from airborne particles and liquid contaminating the face.
