We support our military veterans.

According to the CDC, Maine has the highest mesothelioma mortality rate in the United States. Maine has 22 known naturally occurring asbestos deposits, the majority of which are located in Franklin and Somerset counties. During the first decade of the 2000s, four Maine counties were among the top 50 in the United States with regards to mesothelioma death rates (Sagadahoc, Lincoln, Waldo & Washington). Residents of Maine who worked in the power plants, shipyards, paper mills, iron foundries and/or the military are at an elevated risk of developing mesothelioma or asbestos-related lung cancer.
