Key Takeaways:

This IndustryARC report on the Multifunction Display Market highlights the following areas –

- North America will dominate the multi-function display (MFD) market due to an increase in research activities for the development of advanced and creative technology. North America has the potential to be a prominent player in the global multi-function market throughout the forecast period due to different technological advances.
- Missions can be flown regardless of weather or time of day, and transit flights can take off and land with the help of a synthetic vision system. It helps the aviation industry to overcome various

challenges, this is expected to boost the market growth.

- The emergence of reflecting micro-display technologies also gives prospects for market expansion. The advancement of technologies such as synthetic vision systems and AMLCD (Active-Matrix Liquid Crystal Display) may accelerate the growth of the multi-function display market.

#### Segmental Analysis:

- By Product - Multifunction Display Market has been segmented into electronic flight displays, head-up displays, Head Mounted displays (HMD), helmet-mounted displays, and portable multi-function displays. The head-up displays segment is expected to grow at a faster CAGR during the forecast period.
- By Technology- Multifunction Display Market has been segmented into LED, LCD/AMLCD, TFT, OLED, and Synthetic Vision Systems. The synthetic Vision Systems segment is expected to grow at a faster CAGR during the forecast period.
- By Geography - Multifunction Display Market has been segmented under North America, Europe, APAC, South America and RoW. Because of the increasing number of research efforts for the development of advanced and creative technology, North America will dominate the multi-function display (MFD) market.
