Aerospace Coatings Global Market Report 2022:  
Market Size, Trends, And Forecast To 2026

According to 'Aerospace Coatings Global Market Report 2022 – Market Size, Trends, And Global Forecast 2022-2026' published by The Business Research Company, the aerospace coatings market share is expected to reach a value of nearly \$ 2.34 billion in 2022 at a compound annual growth rate (CAGR) of 9.5%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, effecting many markets across the globe. The aerospace coatings market is expected to grow to \$ 2.95 billion in 2026 at a CAGR of 6%. The growing demand for commercial aircraft is expected to propel the growth of the aerospace coatings market going forward.

The aerospace coatings market consists of sales of aerospace coatings by entities (organizations, sole traders, and partnerships) that are applied to jets, planes, helicopters, and other aircraft to

preserve their beauty and guard against corrosion. Aerospace coatings provide a high level of resistance against high-temperature ranges, extreme UV exposure, air drag erosion, humidity corrosion, and the effect of high-velocity dust particles. It also helps to resist cracking due to variable air pressures.

Product innovations are the key trends gaining popularity in the aerospace coatings market. Major companies operating in the aerospace coatings sector are focused on developing new technological and innovative products to strengthen their position in the market. For instance, in January 2022, Sherwin-Williams Aerospace Coatings, a US-based manufacturer of high-quality exterior and interior paint and coating systems, launched the Aircraft Color Visualizer platform, an online 3D color visualizer tool that lets users experiment with different color schemes for their aircraft. The Aircraft Color Visualizer is a fully interactive desktop tool that lets users design color schemes for six different types of aircraft, including kit planes, single and twin-turboprops, light and heavy-duty business jets, and helicopters.
