

Pafin Partners with Ukrainian IT and Business Processes Outsourcing Company Mobilunity-BPO on Web3

Cost reduction and shorter timeframes become possible with offshore development

TOKYO, JAPAN, December 6, 2022

/EINPresswire.com/ -- pafin Inc.

(Headquarters: Chiyoda-ku, Tokyo; Co-CEO Amin Azmoudeh/ Gaku Saito,

hereinafter "pafin"), which operates Cryptact, an automatic profit and loss calculation service for crypto assets (virtual currency), and an offshore research and development company based in Kyiv, Ukraine Mobilunity LLC (head office: Kyiv, Ukraine; CEO Cyril Samovskiy, hereinafter referred to as "Mobilunity-BPO") has started cooperating on Web3-related operations. Through this initiative, it is possible to reduce the development cost by 70% and the required project period by 75% compared to carrying out similar work in Japan, which is a significant improvement in work efficiency.

Cooperation Background

pafin Inc. is a company that provides DeFi (decentralized finance) and cryptocurrency profit and loss calculation service, called Cryptact, in the Web3 field. With the recent development of Web3, the amount of work to be handled has increased, so they were searching for an efficient solution.

Mobilunity-BPO is a service brand of Mobilunity LLC, an offshore software development company based in Ukraine, which is focused on providing business processes outsourcing services. Ukraine is one of the most advanced IT countries in the world, and is focusing on nurturing IT human resources. According to the Ukrainian Ministry of Economy, Trade and Industry, the scale of the IT industry in the country increased by 15% in the nine months of this year, and exports of computer services increased by 23% compared to the previous year (*). Backed by Ukraine's abundant IT talent, Mobilunity has many years of experience in offshore development and also has developers with blockchain technology, which lies in the base of DeFi. The company also supports Japanese businesses providing a Bridge support service to Japanese clients from Japanese-speaking Ukrainian managers, and was involved in Web3 related work as pafin's partner.
