(Use Company eMail ID to Get Higher Priority)

The Analytics of Things is an emerging market that focuses on the use of data analytics to improve the operation and performance of connected devices. It uses a combination of sophisticated methods for collecting, analyzing, and interpreting different types of data from various sources. This helps organizations gain better visibility into their operations, identify opportunities for improvement, and make informed decisions about their products and services.

Analytics of Things can be used to monitor product usage patterns across multiple locations in real time, track customer engagement trends across channels, and detect anomalies in device performance or user behavior that could point to problems with network infrastructure or suggest malicious activities. Additionally, it can enable companies to uncover correlations between device usage data and user feedback surveys or other user experience metrics which could inform product development efforts.

The following Top manufacturers are assessed in this report

Cisco Systems (U.S.), Microsoft Corporation (U.S.), SAP SE (Germany), Intel Corporation (U.S.), IBM Corporation (U.S.), Capgemini (France), TIBCO Software (U.S.), AGT International (Germany), Google Inc. (U.S.)
