Note: We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

## Sportswear Market Trends and Drivers:

The increasing participation of individuals in sports and fitness activities, owing to the growing incidences of work-related health conditions, including stress and obesity, is primarily driving the sportswear market. Additionally, the widespread adoption of fast-drying t-shirts and materials that can track heart rate, manages body heat, improve circulation, etc., and are produced by using lightweight infrared emitting fabrics and energy infrared technology is further catalyzing the global market. Besides this, the rising utilization of sportswear to protect the wearer against environmental conditions during outdoor activities is acting as another significant growth-inducing factor. Moreover, the escalating demand for these clothing to enhance overall performance by supporting the right muscle groups during training and exercising and providing protection to the sensitive muscle areas is also augmenting the market growth. Apart from this, the inflating need for specialized garments, such as ski suits, swimsuits, leotards, etc., is anticipated to fuel the sportswear market over the forecasted period.
