Market Segment and Regional Analysis

2-Hydroxypropyl Methacrylate (HPMA)s are a type of methacrylic acid ester that is made with $\geq 96\%$, $\geq 97\%$, or $\geq 98\%$ HPMA content. HPMA is a relatively new polymer and is still being researched, so there are many other types of HPMAs that have yet to be discovered. Some other types of HPMAs include 2-hydroxyethyl methacrylate (HEMA), 2-hydroxypropyl succinate (HPS), and 2-hydroxybutyl methacrylate (HBMA).

Acryl polymers for adhesives, inks, and coatings for automotive, appliance, and metal applications are made using HPMA. Incorporating cross-linking sites, strengthening adhesion to

surfaces, and enhancing corrosion, fogging, and abrasion resistance are all benefits of adding hydroxyl groups.

The market for 2-hydroxypropyl methacrylate is divided geographically into North America, Asia Pacific, Europe, the Middle East & Africa, and South America. This study provides an analysis of the market trends in each of the sub-segments for the anticipated period, as well as forecasts revenue growth at the global, regional, and national levels.
