The enterprise streaming media market is rapidly growing, as businesses are recognizing the need to deploy streaming media solutions for their communication and collaboration needs. Streaming media technologies such as video content delivery networks (CDN) have enabled enterprises to use interactive and engaging ways to communicate with customers, partners and employees. This has not only improved the level of customer experience but also provided businesses with unprecedented insights into their operations.

The enterprise streaming media market is categorized based on type of deployment model, end user, technology used, application area, region and pricing models. On the basis of deployment model it is segmented in cloud-based services and on premise solutions. Cloud-based services allow users to access their streaming applications over the internet while on premise solutions offer dedicated hardware installation for a single organization allowing control over content delivery infrastructure.
