The poultry keeping machinery market consists of sales of poultry keeping machinery by entities (organizations, sole traders, and partnerships) that are used in poultry farming to enhance productivity, reduce maintenance costs, enhance the safety of animals, and maintain the health of animals. Poultry-keeping machinery refers to equipment used in poultry farming to maintain temperatures, humidity, and a healthy environment.

Global Poultry Keeping Machinery Market Trends

Technological advancement is a key trend gaining popularity in the poultry-keeping machinery market. Major market players are concentrating their efforts on creating robotic technologies to enhance poultry production and improve animal health and productivity. For instance, in December 2021, TIBOT Technologies, a France-based technology company, launched T-MOOV robotic technology in agriculture and poultry farming. This robotic technology helps to reduce time consumed on repetitive tasks and maintain cleanliness on poultry farms, increasing productivity and security. T-MOOV requires no technical installation and launches with just two presses.
