

December Release of October 2022 National, Top Ten States Manufactured Housing Production, Shipments Data per MHARR

The Manufactured Housing Association for Regulatory Reform (MHARR) has released the most recent national and top 10 states data for HUD Code manufactured homes.

WASHINGTON, D.C., UNITED STATES, December 8, 2022 /EINPresswire.com/

-- The [Manufactured Housing Association for Regulatory Reform \(MHARR\)](#) reports that according to official statistics compiled on behalf of the U.S. Department of Housing and Urban Development (HUD), HUD Code manufactured housing industry year-over-year production declined in October 2022. Just-released statistics indicate that HUD Code manufacturers produced 8,694 homes in October 2022, a 6% decline from the 9,254 new HUD Code homes produced in October 2021. Cumulative production for 2022 now totals 98,506 homes, an 11% increase over the 88,689 homes produced during the same period in 2021.

A further analysis of the official industry statistics shows that the top ten shipment states from the beginning of the industry production rebound in August 2011 through October 2022 — with cumulative, monthly, current year (2022) and prior year (2021) shipments per category as indicated — are:

See illustration for top ten manufactured housing states.

The October 2022 data moves Michigan into 6th place on the cumulative top ten list, while Mississippi falls to 7th place.

The Manufactured Housing Association for Regulatory Reform is a Washington, D.C.-based

national trade association representing the views and interests of independent producers of federally-regulated manufactured housing.

<https://manufacturedhousingassociationregulatoryreform.org/join-mharr/>

Why Join MHARR | Manufactured Housing Association for Regulatory Reform?

Quite simply, because we are consistently correct on the issues that others can be mistaken about.

Years before the current Trump Administration was swept into office, MHARR stood for reasonable federal regulations.

Those regulations should protect consumers while allowing HUD Code manufactured home

producers to create maximum value, quality, and thus opportunities for producers, investors — and thereby also fuel job creation.

Bigger isn't always better. A large organization – that's wrong on the issues that impact consumers and businesses – isn't as valuable as a lean one, like MHARR, that focuses on problems, and then thoughtfully researches, explains and leads the way to profitable solutions.

In a trillion-dollar-a-year U.S. housing industry, MHARR believes manufactured housing should be doing hundreds of thousands of new home sales annually. The need exists. The industry's produced more historically.

So, it's reasonable that manufactured home producers – and those working with them – can do so again, by providing consumers the most value-packed way available today to fulfill the American Dream of Home Ownership.

When you support and join MHARR, you're supporting your own operation's ability to succeed in the manufactured home world.

That's important, because manufactured housing is the solution to the affordable housing crisis. MHARR welcomes members that range from those who want to be low key – to members willing to be highly visible – and other producers/professionals in between.

Together, we can advance the cause of reasonable regulation even more effectively. Call or email us, see the contact information below. ##
