the [orthopedic accessories market](#) grew from \$2.26 billion in 2021 to \$2.46 billion in 2022 at a compound annual growth rate (CAGR) of 9.0%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, effecting many markets across the globe. The orthopedic accessories market is expected to grow to \$2.88 billion in 2026 at a CAGR of 4.0%. The increase in the number of medical cases due to road and sports accidents is driving the orthopaedic accessories market.

Key Trends In The Orthopedic Accessories Market

Companies in the orthopedic accessories global market are increasingly using 3D printing technology to improve production efficiency and for making customized accessories as per the

patient's requirements. 3D Printing technology is a process of making complex structures that are built by stacking up thin layers of a material and cutting out unwanted parts. In the case of orthopedic treatment, many people have different body shapes and sizes. 3D Printing allows companies to manufacture accessories as per the requirement of the patient.

[Overview Of The Orthopedic Accessories Market](#)

The orthopedic accessories devices (or) equipment market consists of sales of orthopedic accessories and related services. Orthopedic accessories are used to fix or remove implants from the body.
