

# UV Filter Market Size to Hit US\$750.6 million by 2027 | Exhibit a CAGR of 6.2% (2022 - 2027)

*High Consumption of Skincare Products will provide a positive impact on the growth of UV Filter Market*

HYDERABAD, TELANGANA, INDIA, December 9, 2022 /EINPresswire.com/

-- IndustryARC, in its latest report, predicts that The [UV Filter Market](#) size is estimated to reach US\$750.6 million by 2027 after growing at a CAGR of around 6.2% from 2022 to 2027. UV filters are the materials that are used to block or absorb ultraviolet rays in order to reduce the haziness created

by ultraviolet light. The filters are made from either organic compound like benzophenone, ethylhexyl methoxycinnamate and cinnamates or from inorganic compound consisting zinc oxide & titanium dioxide. UV filter has various uses like in cosmetic products it is used as sunscreen agent, as UV rays filter in screen printing, as food packaging material, as flexible plastic film for windows & light fixtures and as lens protector in photography. Hence due to such high applicability the material is widely used in sectors like cosmetics, food & beverage, textiles, paper and in construction sector. The report offers a complete analysis of the market, its major segments, growth factors, trends, drivers and challengers, key players and more.
