Fogless Mirrors Market Insight:

Fogless mirrors are primarily installed in the bathroom to prevent the occurrence of condensation while taking a shower or running a hot tap on the basin. The mirrors provide clear reflection and are available in two types, reservoir-based and coated anti-fog mirrors. They have a light assembly, heating element, and reflective coating attached to the transparent substrate. Fogless mirrors are available in different shapes and forms with advanced features, such as infrared on and off switches. They are commonly available in the market under the names: mirror with demister, anti-steam mirror, non-misting bathroom mirrors, anti-fog mirror, and de-fog mirror.
