Typically, asbestos exposure will have occurred sometime between the 1950s and the 1980s. Some of the most prevalent professions that encountered large quantities of asbestos include power plant workers, maritime workers, industrial workers, plumbers, pipefitters, electricians, mechanics, machinists, miners, railroad workers and construction workers, to name a few. Since the latency period for mesothelioma patients is approximately 40 years, most people diagnosed with mesothelioma or asbestos-related lung cancer in 2022 were exposed decades ago.

Vermont became the second state in the United States to mine asbestos when the New England Asbestos Mining and Milling Company began operations at Mount Belvidere in 1899. Vermont

THE STEINBERG LAW GROUP

The Steinberg Law Group has decades of proven experience and the resources to help victims of asbestos exposure and their families obtain the financial compensation they deserve. All of it.

also has over 20 known natural asbestos deposits. As a result, Vermont has a mesothelioma mortality rate that is slightly higher than the national average. Residents of Vermont who worked in the power plants, mines, schools and paper mills are at an elevated risk of developing mesothelioma or asbestos-related lung cancer. www.mesotheliomaoptions.com

Known jobsites, companies and locations with asbestos exposure in Vermont include, but are not limited to, Belvidere Mountain Mine, Fall Mountain Mill, Vermont Yankee Power Plant, Green Mountain Paper, International Paper Company, White Mt. Paper Company, Wyman Flint and Sons, Bennington Pottery Company, Black Cat Textiles, Cooperative Design, H. E.
