the industrial floor coating market is predicted to reach a value of \$5.13 billion in 2022 at a compound annual growth rate (CAGR) of 4.59%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, a surge in commodity prices, and supply chain disruptions, affecting many markets across the globe. The industrial floor coating market is expected to reach \$6.21 billion in 2026 at a CAGR of 4.86%. The industrialization of floor coatings globally is significantly contributing to the growth of the industrial floor coating market.

Key Trends In The Industrial Floor Coating Market

New product launches are a key trend in the industrial floor coating market. Companies are launching innovative and improved coating products to increase their customer base and

revenues. For example, in 2021, Sika Group, a Swiss specialty chemical company, launched a new technology for ESD coatings. Sikafloor®-2350 ESD is a protective dissipative self-leveling system for concrete or cement screeds that is especially suitable for areas with low electrostatic charge requirements. In 2021, Unilin Technologies launched the Unicoat waterproof coating for flooring.

[Overview Of The Industrial Floor Coating Market](#)

The industrial floor coating market consists of sales of industrial floor coatings by entities (organizations, sole traders, and partnerships) that manufacture industrial floor coatings. Floor coatings are tough, protective layers used in applications where heavy surface wear or corrosion is expected. Typical applications include chemical plants, warehouses, and manufacturing floors. Floor coatings are also used to brighten or define areas of facilities.
