Report 2022”, the automotive chassis dynamometer market is expected to grow from \$0.189 billion in 2021 to \$0.195 billion in 2022 at a compound annual growth rate (CAGR) of 2.76%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, a surge in commodity prices, and supply chain disruptions, affecting many markets across the globe. The automotive chassis dynamometer market is expected to reach \$0.217 billion in 2026 at a CAGR of 2.76%. The increasing manufacturing of automobiles is expected to drive the automotive chassis dynamometer

market in the forecast period.

Key Trends In The Automotive Chassis Dynamometer Market

Mobile and portable chassis dynamometers are a key trend gaining popularity in the automotive chassis dynamometer market. Portable dynamometers allow users to perform environmental testing under real-world conditions and serve as an economical alternative to their sophisticated, in-house, testing facilities.

Overview Of The Automotive Chassis Dynamometer Market

The automotive chassis dynamometer market consists of sales of automotive chassis dynamometers by entities (organizations, sole traders, and partnerships) that are used in the automotive industry for measuring and recording mechanical parameters such as force, power, speed, and torque of vehicles at drive wheels. Chassis dynamometers are test equipment consisting of a pair of rollers, a braking absorption system, and software to calculate drive input and power output, such as torque and power at the wheels.
