As per The Business Research Company's "Chartered Air Transport Global Market Report 2022", the chartered air transport market is predicted to reach a value of $78.74 billion in 2022 at a compound annual growth rate (CAGR) of 9.9%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, effecting many markets across the globe. The chartered air transport market is expected to grow to $104.53 billion in 2016 at a CAGR of 7.3%.  Technology is expected to be a continued driver of the chartered air transportation services market's growth during the forecast period.

Key Trends In The Chartered Air Transport Market
Airlines are actively making use of wearable technology to enhance operational efficiency, maintenance, and to provide add-on entertainment to passengers. Wearable technology

includes the use of smartphones, personal electronic devices, smart glasses, smartwatches, near-field communication (NFC), and Bluetooth technology to improve and simplify the passenger experience. These technologies help passengers improve safety and efficiency, and receive updates and information related to their flight. They are capable of helping pilots, crew members, and maintenance teams monitor gas concentrations, levels of noise, and temperature to avoid mishaps. Smartwatches allow passengers to upload their ticket-related information on these devices. About 77% of the 6,000-plus passengers surveyed in a study said they would be comfortable with the use of wearable technology to help them during their journey. Some companies making use of such wearable technologies include Virgin Atlantic, Japan Airlines, EasyJet, and British Airways.

Overview Of The Chartered Air Transport Market
The chartered air transports market consists of sales of chartered air transportation services and related goods by entities (organizations, sole traders, and partnerships) that use aircraft, such as aeroplanes and helicopters, to provide chartered (non-scheduled) air transportation services for passengers and/or cargo at a toll per mile or hour for the charter of the aircraft.
