2022”, the [couriers and messengers market size](#) is predicted to reach a value of \$709.46 billion in 2022 at a compound annual growth rate (CAGR) of 13.4%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, effecting many markets across the globe. The couriers and messengers market is expected to grow to \$1.08 trillion in 2016 at a CAGR of 11.3%. Courier and express delivery service providers are increasingly using automated parcel terminals.

[Key Trends In The Couriers And Messengers Market](#)

Automated parcel terminals are computer-controlled units that allow customers to collect, hand in, and return parcels around the clock. These terminals are deployed at locations with

maximum footfall, such as walkways, convention centers, grocery outlets, shopping malls, convenience stores, gas stations, and railway stations. These terminals improve the quality of the delivery services network and reduce last-mile delivery management costs for the company. Automated parcel terminals are being extensively used in Europe and the global market for automated parcel delivery terminals is expected to reach \$ 1.06 billion by 2025, thus indicating a significant potential for these automated systems.

Overview Of The Couriers And Messengers Market

The couriers and messengers market consists of sales of courier and messenger services and related goods by entities (organizations, sole traders, and partnerships) that provide tracked, guaranteed, and express delivery services of parcels within intercity, local, and/or international geography without operating under a universal service obligation. The industry includes the establishments that provide sorting and transportation services for parcels. The industry also includes establishments that provide local messengers, who usually deliver the parcels within a metropolitan or single urban area and mostly use bicycles, on-foot, small trucks, or vans.
