

NGN International and PowerDMARC expand their operations in Bahrain

NGN International signs with PowerDMARC at Arab International Cybersecurity Summit 2022, to expand its operations and combat email fraud attacks in Bahrain.

MIDDLETOWN, DELAWARE, UNITED STATES, December 14, 2022 /EINPresswire.com/ -- NGN International with PowerDMARC signs at Arab International Cybersecurity Summit 2022, to expand its operations and combat email fraud attacks in Bahrain.

Bahrain-based managed security service provider NGN International attended the signing-off ceremony at the Arab International Cybersecurity Summit (AICS) 2022, Bahrain, to further their long-standing partnership with leading US-based email authentication SaaS provider, PowerDMARC. This agreement will accelerate the efforts further, after the great success in 2022 in Bahrain.

NGN International and PowerDMARC expand their operations in Bahrain

Mr. Yaqoob Al-Awadhi, CEO of NGN, stated that this agreement provides the individuals and institutions in the Bahraini market with one of the enhanced and cutting-edge solutions from the "[DMARC](#)" system to ensure the highest standards of cybersecurity and protection from complex phishing attacks and impersonation, using the best security technologies. He said that this system is ideal for many reasons, including that the "NGN" technical team can create technical solutions suitable for the Internet domain of the institution, company, or organization, in addition to controlling and monitoring it.

"PowerDMARC and NGN International share a common goal when it comes to protecting organizations in Bahrain against email fraud, and increasing DMARC and email authentication adoption in the country. PowerDMARC makes it easier for domain owners to leverage complex

email authentication protocols, and manage their configurations over a simple and easy-to-use SaaS platform. With continued support from NGN, we are hoping to cover fresh grounds in Bahrain and minimize email threats,” said Maitham Al Lawati, CEO of PowerDMARC.

Email fraud attacks like phishing and spoofing have been wreaking havoc in the online space for organizations around the world, costing companies a ton of money annually, and causing serious reputational damage.

Implementing DMARC and [MTA-STX](#) along with other email authentication protocols is a solution to this problem.

About NGN

NGN International is a full-fledged systems integrator and managed security services provider established in 2015 in Bahrain.

The company’s digital transformation consulting and top-notch technology solutions and services provide true business value to the customers.

Committed to digital culture, NGN International contributes to customers’ wins in competitive battles, improves their business efficiency and continuity, and helps develop products and services more cost-effectively and discover new growth opportunities.

NGN International helps customers drive digitalization and transform processes most effectively by adopting leading-edge technologies: cybersecurity, IT Service Management, Artificial Intelligence, Internet of Things, Robotic Process Automation, and Cloud Infrastructure Automation Services.
