Retort packaging will see major growth in the food and beverage industry as the rising per capita disposable income of the population has influenced consumer spending trends and resulted in high demand for convenience and packaged foods. The increasing working population and rising use of convenience foods to save time in fast paced lifestyle are also expected to influence the retort packaging market potential over the forecast period.

Retort Packaging Market

However, the sustainability trend in the packaging industry is expected to hinder the retort packaging market potential through 2028. Retort packaging companies are expected to invest in the research and development of sustainable alternatives that are compliant with the government mandates that are banning the use of plastics in packaging to avoid detrimental effects on the environment whose conservation is of paramount importance at the moment.

Increasing demand for sustainable packaging solutions is anticipated to be a major challenge for retort packaging companies over the forecast period. The use of sensors and other technological components makes it hard for retort packaging to be completely sustainable and strict mandates against non-recyclable packaging across the world will prove to be a challenge to overcome in the long run.

Global Retort packaging Market

The pandemic of 2020 brought along multiple restrictions and created an adverse situation for multiple markets. Retort packaging market growth saw a downfall owing to the closure of multiple manufacturing and sales channels across the world. The retort packaging companies faced with huge losses in the pandemic will try to recover in the post-pandemic era. Lockdown restrictions made it highly difficult for the packaging industry to stay lucrative.

However, this trend is expected to change as lockdown restrictions are lifted to ensure the world returns to a normal situation. As sales channels open the sales of packaged foods will also rise and hence drive the retort packaging market growth as well. The retort packaging market will see steady growth through 2028.

The global retort packaging market is segregated based on type, material, end user, and region. Based on end user, the global market is distinguished into food, beverage, and Others (pharmaceutical and personal care products). The food and beverage segments will be the most prominent ones in the global retort packaging marketplace through the forecast period. However, demand from other segments will also see a prominent rise through 2028

The Asia Pacific region is expected to hold a dominant share over the forecast period in the global retort packaging industry landscape. Rapid urbanization, increasing per capita disposable income, changing consumer preferences, rising spending potential trends are major factors guiding the retort packaging market growth in this region. India, China and Japan are expected to be the most notable markets for retort packaging in this region over the forecast period and will be majorly driven by increasing demand for packaged and convenience foods.

Key players functioning in the global retort packaging market include Amcor PLC (Australia), Berry Global Inc. (US), Sonoco (US), Huhtamaki Oyj (Finland), Mondi Group (South Africa), Otsuka Holdings Co. Ltd (Japan), Tredegar Corporation (US), Coveris (Austria), Clondalkin (Netherlands), Sealed Air Corporation (US)

Recent developments:

In October 2020, Constantia Flexibles a renowned name in the packaging industry announced a change in its operating procedures and have increased its focus on consumer markets to meet the increasing demand from this sector
