And Global Forecast 2022-2026' published by The Business Research Company, the technical illustration software market size is expected to grow from \$ 4.21 billion in 2021 to \$ 4.52 billion in 2022 at a compound annual growth rate (CAGR) of 7.5%. The rise in demand for games with realistic and high-quality graphics is driving the growth of the technical illustration software market. A game is a form of play that is usually undertaken for entertainment purposes and as an educational tool. The increasing demand for realistic and high-quality graphics in games has led to the adoption of technical illustration software as it develops new games with enhanced features and graphics.

The technical illustration software market trends consists of sales of technical illustration software by entities (organizations, sole proprietors, and partnerships) that are used to absorb complex information quickly to display technical illustrations and animations. Technical illustration software provides technical communication that delivers technical information through the means of visual aids to a non-technical audience. The technical illustration is easy to understand, visually appealing, and can be navigated. This software produces diagrams, images, and schematics to convey various technical objects.

[Global Technical Illustration Software Market Trends](#)

Technological advancements have emerged as a key trend gaining popularity in the technical illustration software market. Technology advancements such as AI generative design, topology optimization, real-time simulation, design exploration, and others elevate 3D modeling tools and change them into design assistants that could participate in the development process as well.

[Global Technical Illustration Software Market Segments](#)

The global technical illustration software market is segmented:

- 1) By Component: Solution, Services
 - 2) By Technology: 2D Technology, 3D Technology
 - 3) By Organization Size: Large Enterprises, Small And Medium-Sized Enterprises (SMEs)
 - 4) By End-User: Automotive And Machinery, Aerospace And Defense, Architecture, Engineering And Construction, High-Tech And Telecommunications, Energy, Oil And Gas, Other End-Users
