Yeast are unicellular fungi with entirely different properties than bacteria. Yeast is used in wine and is the most important difference between wine and grape juice. In the absence of oxygen, yeast aids in the conversion of wine grape sugar into alcohol and carbon dioxide via the fermentation process.

#### Recent Development

- Lallemand Baking will launch LalFerm, a new brand of fresh wine yeast, in North America in 2019. The new brand provides Wine with customised wine yeast solutions for their applications (lean dough, sweet dough, rich dough, frozen dough, flexible proofing, Vitamin D rich, etc.).
- Angel Wine yeast Co. Ltd debuted its new purpose-built wine yeast and biotechnology R&D Center in China in 2018. The new centre has a total area of 36,000sqm and can house up to 1,500 people engaged in R&D and related work, with the goal of transforming the complex into a world-class biotechnology product R&D centre and a leading Global wine yeast technology research platform.

## Opportunity

Due to the rising global consumption, the establishment of mega food parks and an increase in the number of food and beverage manufacturing units are expected to aid the growth of the wine yeast market. Various factors such as advancement in technology, active research and development techniques, productivity growth, growing population resulting in growing demands, government subsidies and lucrative schemes for plant setup and expansion, abundant raw material, and improved connectivity and easy policies for industries to grow catalyse the increase in food processing plants.

## Restraints

However, stringent government regulations for wine yeast and wine yeast derivative products are expected to limit the use of wine yeast. Although organic food consumption benefits consumers' overall health, one of the major factors discouraging consumers is the high prices associated with organic products. Organic food is generally expensive due to the high costs of agricultural production and processing. The need for legal regulations and compliance in a specific country also contributes to the product's high pricing which challenges market growth.
