Industry Drivers:

The expansion of retail sector across the globe acts as one of the major factors driving the growth of smart retail market. The increase in use of robots and automation to offer shopping

convenience to customers, and increased use of smart technologies by retailers owing to the change in customer expectations accelerate the market growth. The adoption of big data analytics, blockchain, machine learning, and artificial intelligence technologies by retailers further influence the market. Additionally, rise in the adoption of Internet of things, rise in e-commerce sector, surge in disposable income and high focus on offering better shopping experiences positively affect the smart retail market. Furthermore, increase in number of smart stores to lead to rise in adoption of self-delivery vehicles extend profitable opportunities to the market players in the forecast period of 2022 to 2029.

On the other hand, high maintenance costs of advanced high-end computing systems and high risks of customer data thefts are expected to obstruct the market growth. Increase in instances of shoplifting is projected to challenge the smart retail market in the forecast period of 2022-2029.

Market Segmentation of Smart Retail Market:

On the basis of system, the smart retail market is segmented into system, smart retail market is segmented into digital signage solutions, smart labels, smart payment system, intelligent vending machines, augmented reality solutions, virtual reality solutions, POS solutions, smart carts, robotics and analytics. Digital signage solution is sub-segmented into displays, media players, PCs and set-top boxes, mounts and cables. Smart labels are sub-segmented into smart beacons, and electronic shelf labels. Smart payment system is sub-segmented into NFC-ready POS terminals, and NFC-ready MPOs terminals.

On the basis of application, the smart retail market is segmented into foot traffic monitoring, inventory management, smart fitting rooms, brand protection, predictive equipment maintenance and loyalty management and payments.

On the basis of retail offering, the smart retail market is segmented into apparel and accessories, fast moving consumer goods, hardlines and leisure goods and others.

On the basis of technologies, the smart retail market is segmented into visual recognition, blockchain, artificial intelligence and mobiles.
