Key Market Analysis and Insights:

[Global gamma knife market](#) is on the rise and will continue to witness an upward trend for the forecast period of 2021-2028. Currently standing at the market value of USD 269.53 million, the gamma knife market will rise up to USD 342.23 million by the end of the forecast period. This is because of the growing awareness about the advantages of this radiation therapy globally. Thus, following the current trends the global gamma knife market is set to exhibit a CAGR of 3.03%.

Gamma knife is a radiation therapy that is particularly used to deal with tumours such as brain tumour. It is a surgery that involves the use of a beam of extremely focussed gamma rays that are targeted on the tumour or the tissue to destroy and cut down the same. The major advantage of gamma knife therapy is that it doesn't harm the nearby cells or tissues. One doesn't experience any side effects of the same as well. This is why the surgery is safer than any other open surgery. The gamma knife therapy surgery is majorly used for the surgery of tumours in the brain in the spinal cord.
