The key highlights of the report include:

Market Overview (2017-2027)

Forecast CAGR (2022-2027): 10%

The global market for laminating adhesives is being driven by rising applications in flexible packaging solutions. The rising use of laminating adhesives is due to the increasing concern about waste generation and emissions. The water-based variants of laminating adhesives are also being used for high-performance laminations and one-part systems for applications related

to outdoor in the automotive sector, hence providing impetus to the market.

Moreover, factors such as rising disposable income, growing middle-class population, and changing lifestyles have collectively propelled the demand for healthy packaging solutions in the food and beverage sector, which is boosting the growth of the market.

## Industry Definition and Segmentation

Laminating adhesives are adhesives deployed in the development of films with superior properties. They have high peel strength, excellent durability, and stability, as well as high-tunnelling resistance, due to which they are widely utilised in flexible packaging applications. Laminating adhesives find extensive applications in the manufacturing of industrial fabrics and cable wraps, among others.

On the basis of type, the market can be divided into:

- Solvent-borne
- Water-borne
- Solvent-less
- Others

Based on application, the market can be segmented into:

- Packaging
- Food Packaging
- Medical Packaging
- Others
- Industrial
- Transportation
- Others

The regional markets for laminating adhesives include:

- North America
- Europe
- Asia Pacific
- Latin America
- Middle East and Africa

Market Trends

The growing applications of laminated food adhesives in packaging applications catering to the healthcare sector are boosting the market growth. This trend is being supported by the rising consumer awareness pertaining to the health benefits of healthy packaging. This rising demand for packaged goods has led numerous food and beverage MNCs to set up their manufacturing facilities in multiple locations, which has resulted in an increasing demand for packaging, hence positively influencing the demand for laminating adhesives. The increasing development of production facilities and capacities in the consumer goods, medical, and automotive sectors is another factor expected to push the growth of the market.

### Key Market Players

The major players in the market are Henkel AG & Co. KGaA, 3M Company, Evonik Industries AG, DIC India Limited, and DuPont de Nemours, Inc., among others. The report covers the market shares, capacities, plant turnarounds, expansions, investments and mergers and acquisitions, among other latest developments of these market players.

About Us:

Expert Market Research (EMR) is leading market research company with clients across the globe. Through comprehensive data collection and skilful analysis and interpretation of data, the company offers its clients extensive, latest and actionable market intelligence which enables them to make informed and intelligent decisions and strengthen their position in the market. The clientele ranges from Fortune 1000 companies to small and medium scale enterprises.

EMR customises syndicated reports according to clients' requirements and expectations. The company is active across over 15 prominent industry domains, including food and beverages, chemicals and materials, technology and media, consumer goods, packaging, agriculture, and pharmaceuticals, among others.

Over 3000 EMR consultants and more than 100 analysts work very hard to ensure that clients get only the most updated, relevant, accurate and actionable industry intelligence so that they may formulate informed, effective and intelligent business strategies and ensure their leadership in the market.
