Exeter Orthodontics offers only braces and Invisalign aligners. This has enhanced efficiency and kept overhead low, leading to cost savings for patients. Payment plans are also available.

Traditional braces remain the most popular orthodontic treatment because of their high success rate. New technology has made them more comfortable and more

convenient than in years past. They can even be transparent to blend in seamlessly with a patient's smile.

[Invisalign in Millersville](#) is another popular option. Like traditional braces, Invisalign also costs only \$3,995. Invisalign uses transparent, removable aligners to straighten teeth. Their comfort and convenience have made them a popular option among adult patients. If the aligners are worn for 20 to 22 hours per day, patients can see results in as little as one to two years.
